

Reporting Services Questions: Who hosts your reports?

Hosting is provided by DiscountASP.net. I do have a bias towards DiscountAsp.Net but that won't stop me from giving you an honest opinion. I like them. Their inexpensive, fast, and stay up to date with the latest technologies.

While staying up to date with Microsoft's latest technology isn't necessarily a good thing, if you are a developer (like me), sometimes it's hard to resist. DiscountASP.net is a great playground for just such an urge. Their control panels work well (mind blowing if you are familiar with linux/unix hosting) and I had no issues getting my ReportViewer asp.net pages up and running. I added my database, uploaded my files and modified the web.config. Done.
