

Reporting Services Questions: Why aren't multiple spaces appearing on my report?

While I wouldn't recommend using spaces for formatting, if you have to they are supported in Microsoft Reporting. However multiple spaces will not appear in the HTML preview when designing a report (or exporting to HTML). The reason this happens is that HTML treats consecutive spaces as one space. HTML does have the non breaking space tag () but it is not supported in HTML view of the reports. However, when you view the reports in ReportViewer or export to PDF, the extra spaces will appear.
