

## *Reportpax Labels Questions: Can I print labels from reports exported to PDF?*

Yes it does work, with one caveat. This goes the same for any report exported to PDF. You might have noticed that the margins were off when you tried to print. There is one important setting you must change when printing from Adobe Reader that trips people up (myself included).

When the Print window opens in Reader, simply set Page Scaling to None like below:

Then when you print, your margins and alignment should be correct now.

Thanks to Doug B. for this tip.
