

*Reportpax Labels Questions: We are using .Net Framework 1.1 and using SQL Server 2000 RS. Do you have a demo for that?*

The reports were originally designed for SQL Server 2000 RS, however I currently do not have a live demo available. As an alternate solution, I created the [sample ReportViewer application](#) so you could get a feel for how the labels look and print. Labels displayed and printed in the [sample ReportViewer application](#) will look and print identical to SQL Server 2000 Reporting Services.
